

Ascio Local Presence Service

At Ascio we can offer all our partners Local Presence in 39 countries. This service allows customers to register domains even under some of the more restricted TLDs where Local Presence requirements would otherwise make such registrations impossible.

Ascio's advanced systems are able to register domain names anywhere in the world: however some countries restrict access to their TLDs by imposing specific requirements on the applicants that wish to register a domain name.

For example, in some cases only local companies can register a domain name (like in Slovakia, .SK). In other cases the regulations require the registrant to have a local representative acting as administrative contact, for example Germany (.DE), or to have an address in the country (as in the case of The Netherlands, .NL).

However companies often want to secure their brand names and trademarks on a worldwide basis which can be complicated if they do not have the necessary Local Presence.

Best and most reliable service

We offer our own Local Presence Service that can help those customers who do not fulfil specific Local

Presence requirements to register their domain names even under these more restricted TLDs. In the few instances where we cannot be present in the specific country ourselves, we rely on an extensive network of reliable agents. These agents are selected in accordance to very strict legal and technical requirements.

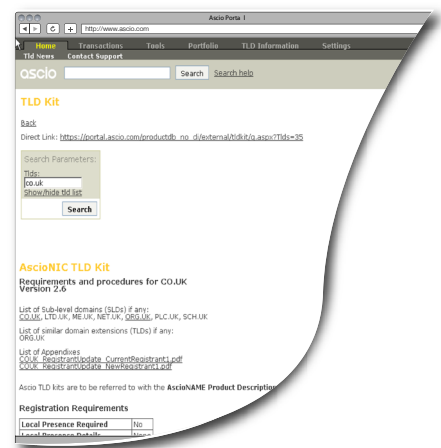

The Local Presence Service is always provided in accordance with the specific Registry regulations and within a controlled legal framework, to ensure the best and most reliable service to partners and customers.

Today the Ascio Local Presence Service empowers partners to offer premium registrations in 39 countries where registration was previously restricted. Ascio is constantly working to grow this list to help benefit both you and your customers.

Feel free to contact us if you have any questions regarding our Local Presence offering or if you need Local Presence in any destinations not mentioned in the list below.

- For more details on the specific Local Presence offers you can always refer to the TLD Kits in the Ascio Portal
